

United States Patent [19]

Sparapany et al.

[11] Patent Number: **4,921,904**

[45] Date of Patent: **May 1, 1990**

[54] **SUPERABSORBENT POLYMERS**

[75] Inventors: **John W. Sparapany**, Bolingbrook;
Dennis P. Bakalik, Woodridge, both
of Ill.

[73] Assignee: **Nalco Chemical Company**,
Naperville, Ill.

[21] Appl. No.: **286,106**

[22] Filed: **Dec. 19, 1988**

[51] Int. Cl.⁵ **C08F 8/32**

[52] U.S. Cl. **525/329.9; 525/329.5;**
525/379; 525/382

[58] Field of Search **525/329.9, 329.5**

[57] **ABSTRACT**

A substantially water-insoluble, slightly cross-linked, partially neutralized, hydrogen-forming polymer composition consisting essentially of

(a) from about 50 mole percent to 99.999 mole percent of polymerizable acid group-containing monomers, and

(b) from about 0.001 mole percent to 10 mole percent of a water-soluble polyamine;

said hydrogel-forming polymer composition having been formed by reacting a water-soluble acid group-containing vinyl polymer with a water-soluble polyamine at a temperature sufficient to convert the substantial portion of the amino groups of the water-soluble polyamine into amido groups.
